

PANAIR Installation

URL: <http://www.pdas.com/panairdownload.html>

PREREQUISITES:

- A fortran compiler, gfortran will do.

HOW TO USE:

1. Download panair.zip from <http://www.pdas.com/packages/panair.zip>
2. Compile by using the command: `gfortran panair.f90 -o panair.exe`
3. Before launching panair.exe, clean502.bat must be launched in order to delete the old temporary files of the previous run.

NOTE: The Panair version available at pdas.com does not have a batch mode. In order to have a Panair version with batch mode, copy and paste this fortran source file onto your Panair directory and compile it by using:

```
gfortran panair_input_args.f90 -o panair.exe
```

panair_input_args.f90

PANIN Installation

URL: <http://www.pdas.com/panindownload.html>

PREREQUISITES:

- A fortran compiler, gfortran will do.
